Hours

Mon-Thurs

Open 10am-12:00 pm
& 12:30pm-3:30pm

Closed 12-12:30pm

Closed all day Friday

What's inside a Safe Injection Kit?

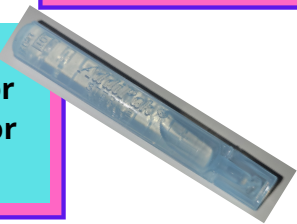

Sterile Syringe-provides a clean tool for injection

Cotton-Acts as a sterile filter to catch the drugs that don't dissolve

Sterile Water-Clean source for mixing drugs for injection

Tourniquet-Helps with finding a vein and keeping the vein plump for injection

Alcohol Pads-Helps clean the injection site on the skin, preventing bacterial infections

Cooker-Acts as a clean place to mix and heat the substance for injection

Why Safe Injection Kits & programs are important

Reduce transmission of HIV and Hepatitis C infections by encouraging people not to share needles & tools

Using safe sterile tools for injection paired with education around safer injection can help reduce chances of

- abscesses
- blood infections
- vein damage
- scars/ track marks

These programs act as a bridge to other health services:

- HIV & Hep C testing and treatment
- Vaccinations
- Substance use treatment

They provide a safe way for disposing of used syringes

Our Drop In Services

Syringe access and disposal
Safer smoking kits
Overdose education
naloxone and fentanyl test strips
